

AIRBOX™

PEAK SERIES-S

**PRODUCT GUIDE
& SPECIFICATIONS**

AIRBOX[™]
PEAK SERIES - S

CLEAN AIR PURE & SIMPLE.

**SMALL FOOTPRINT
LARGE VOLUME**

Serving home, medical and industrial applications, the AirBox Peak Series-S is categorically the most effective and efficient Air Purifier on the market. Like the name suggests, the Series-S is made of the highest quality materials and provides the most pure air money can buy.

HIGH-DENSITY POLYETHYLENE (HDPE)

The quality of materials used to build the unit render it effectively indestructible (it will even stop a .45 caliber bullet). This paired with the craftsmanship, makes the Peak Series-S resistant to elements of the most harsh environments.

ANTIMICROBIAL SURFACE TREATMENT

The HDPE enclosure incorporates a permanent antimicrobial treatment that is 99.9999% effective at inhibiting the growth of harmful microbes on the surface.

FAN & MOTOR HOUSING UNIT

Designed and built by German Engineers, the Heart of the Series-S is the most advanced Fan / Motor assembly available today. Built to run 24 hours a day, 7 days a week for a lifetime. The Fan & Motor package provides over 12,000 cubic feet per hour (CFH) of clean air using less than 50 watts of power. If sheer volume is what you need, the Series-S can deliver over 24,000 CFH at less than 170 watts.

POWER & SPEED CONTROL KNOB

The speed and volume control of the Peak Series-S is provided by a simple dial on the front of the motor housing. Thereby, eliminating complex electronics or boards and mitigating electrical issues.

AIR CHANNELING HONEYCOMB

Located at the top and bottom of the Peak Series-S, this helps to guide airflow evenly onto the filters for capturing the maximum amount of airborne particulate.

AIR INTAKE

It all starts here. Providing over 24,000 Cubic feet per hour of Antimicrobial, Chemical, and HEPA Filtration, it measures a mere 13" x 13" x 27" in size.

STATE-OF-THE-ART AIR FLOW & FILTRATION

1

ODOR SHIELD

ACTIVATED CARBON FILTER

When passing through the Activated Carbon Filter the air is cleansed of Chemicals, Volatile Organic Compounds (VOC's), Bioeffluents, and Unpleasant Odors. Unique to our activated carbon filter, the carbon particles are prevented from releasing downstream into the other filters, dramatically increasing the Series-S effective life cycle.

EXTREME ODOR SHIELD

can be purchased - heavyweight carbon filter cleans even the worst air situations.

2

GERM PROTECTION

ANTIMICROBIAL FILTER

The Series-S Antimicrobial Filter is 99.9999% effective at capturing and inhibiting the growth of airborne microbes. A microbe is a living thing that is too small to be seen with the naked eye. Many of these airborne microbes can be harmful (in some cases deadly) to humans, including: Bacteria, Protists, Fungi, Viruses, and Microscopic Plants & Animals.

3

PURIFYING HEPA

CERTIFIED HEPA FILTER

High Efficiency Particulate Air (HEPA) filters are the World Standard for the provision of "Clean Air". The Series-S HEPA filter is 99.99% effective in removing particulate size of 0.3 micron and even more effective in capturing smaller particles.

Unique to the Series-S HEPA is the Controlled Media Spacing which enables the unit's high-flow capacity.

PERFORMANCE SPECS

Watts	Cubic Feet Per Minute	Cubic Feet Per Hour	Decibels
5	50	3,000	32
10	100	6,000	34
30	180	10,800	46
60	250	15,000	52
100	300	18,000	67
160	400	24,000	72

MAX FLOW RATE

3,000 SQUARE FEET PER HOUR

OR

24,000 CUBIC FEET PER HOUR

This large volume capacity means the Peak Series-S handles the largest homes with ease.

NEED TO ORDER NEW FILTERS?

You are able to order new filters
online as well as set-up a reoccurring
delivery of filters when changing is
recommended. For more information
please visit us online at:

LIFETIME WARRANTY ON MATERIALS & CRAFTSMANSHIP

As American Craftsmen, AirBox
stands by our product with a lifetime
warranty on materials and
craftsmanship as well as a 10 year
warranty of the Fan & Motor Package
inclusive of electrical circuitry.
